Ronald L. Jones
Chief Examiner

Legislative Committee on Public Accounts
Alabama State House
State of Alabama
Montgomery, AL 36130

Dear Committee Members:

In accordance with your resolution of December 9, 1975, we submit our annual report of real property leased by the State of Alabama from private entities.

Cost

The annual cost to the state for leased space from private entities for leases in effect as of October 1, 2007 was $33,173,458 as compared with $30,903,345 for leases in effect at October 1, 2006, an increase of 7.34%.

Source of Information

State agencies were requested to complete a questionnaire and furnish a copy of each lease for real property leased from private entities, provided that the lease was in effect as of October 1, 2007. Information on each leased property was obtained from the lease agreement and the lease questionnaire. The lease questionnaire supplied the name and address of the current lessor and the data for square footage when the square footage was not explicitly stated in the lease agreement.

Property Ownership

Lessors were requested to supply ownership information and to confirm the annual lease cost reported on the lease questionnaires received from state agencies. Exhibit IV summarizes the number of leases, property, location, annual cost, and total square feet leased from each property owner.

Leases for Less Than One Year

Leases for periods less than one year are not included in the exhibits and are summarized as follows:

Agency	Owner and Address of Property	Use	Term of Lease	Total Sq. Ft.	Monthly Cost	Total Cost For Lease Period
Rehabilitation Services	Bradley Williams Properties 1738 &1740 Taliaferro Trail Montgomery, AL 36117	Office Storage	08/01/07 - 12/31/07	3,200	$3,466.67	$17,333.35

The total cost of leases for periods less than one year ($17,333.35) and the total cost of leases shown on the exhibits ($33,156,125) comprise the $33,173,458 total annual cost as of October 1, 2007.

Lease Agreements with Consideration other than Direct Payments

Some state agencies negotiated lease agreements for which consideration other than direct payments was provided. Most of these leases are for radio/television tower sites. The annual cost shown on the exhibits is $0.00 or a nominal amount such as $1.00. Other types of consideration provided to the lessors include maintenance of roads or driveways to the tower sites and installation and maintenance of a gate, an alarm system, and a power generator.

Statutory Limitation for Montgomery Leases

The Code of Alabama 1975, Sections 36-24-1 through 36-24-4 authorizes the renting of office space in the city of Montgomery, but limits the amount to be expended to $40,000 per year. Although the $40,000 statutory limitation was set in 1949, it remains a part of Alabama law. Leases for Montgomery office space in effect as of October 1, 2007, total $1,786,412.77. In addition, Montgomery leases for combination office/storage space total $3,856,191.17.

Schedule of Leases Added / Not Renewed

Exhibit X is a summary, by state agency, of leases that appear in the prior year report but not in this report and also of leases in this report but not in the prior year report. Exhibit XI (Schedule of Leases Added) and Exhibit XII (Schedule of Leases Not Renewed) are detailed listings of the leases summarized in Exhibit X.

Standard Lease Form

The Office of State Buildings and Space Management, Department of Finance, has standardized a form for lease agreements (not required, but encouraged). We recommend that this form be used by all state agencies and that all lease agreements be routed through the Office of State Buildings and Space Management. Several state agencies already use the standard form.

Use of non-standard forms resulted in insufficient information, such as:

Some lease agreements were not dated.
Some lease agreements were not signed by department officials.
Some leases did not bear the Governor's signature.
Some leases did not specify the dimensions of the space leased.
Some leases contained unclear provisions.

Floor Space

For some leases, rented space had been calculated from exterior measurements while other leases had specified interior measurements. This caused an inconsistency in the determination of cost per square foot. A standard method of determining the dimensions of space leased should be established by the Office of Space Management, Department of Finance. All state agencies leasing real property should be required to use the method established.

Advertising

State agencies are not required by statute to advertise their needs for office space. However, such needs should be made known through public advertisement. This should provide the state with both a wider choice of available properties and more competitive prices.

We wish to thank the state agencies and property owners for providing us the necessary data to compile this report.

Respectfully submitted,

Ronald L. Jones
Chief Examiner
